

Michele Awada

Full Stack Developer

About Me

Hello, I'm Michele. A tech whiz and enthusiast. Creating modern websites.
*I find the **most** optimal solution, not just the one that works*

Experience

2020 - current

Graphic Designer

Kalidy LCC – Oklahoma, USA

 - Git
 - Github
 - jQuery
 - Traefik
 - Adobe Illustrator
 - Gunicorn
 - Linux
 - Node.js
 - NPM
 - RegEx
 - Bash
 - VPS
 - Vite
-

Projects

- [Mug](#) a fast social media platform, follow others, like others posts, and read, delete, edit, and create posts and comments, login with simple

one tap google or standard username and password, and so much more. Made clean optimal code, with **React** on the frontend, and Django restAPI on the backend.

- My [Portfolio](#) is a modern simplistic website where know more about me and check out my beautiful designs
- [Kentucky Game](#) is a game based on a chicken called kentucky, eat the worms, bananas, and strawberries, that heal you, and glide over from the dangerous foxes and hawks in the sky.
- [Chess](#), play against a bot that tries to minimise your chances of winning
- [Friendly Fur](#) is a website where you buy dog food, treats and toys for your dog. You can also **detect allergies** of your dogs
